

THE ESTATE OF ERIK A. POWELL, etc., et al. v. CITY AND COUNTY OF
HONOLULU

U.S. District Court for the District of Hawaii
Civil No. CV04-00428 DAE-LEK

EXHIBIT "33a"

Richard Thomas Gill
2104 West Riverside
Spokane, WA 99201
Phone/Fax: (509) 624-3714
Email: RickGill.ACS@Verizon.Net

LICENSE:

Certified Human Factors Professional, 1994-present
By the Board of Certification in Professional Ergonomics
License Number 0526, 1994

Certified XL Tribometrist, 2002-present
By the International Safety Academy
License Number A2002-0272

EDUCATION:

University of Illinois
Ph.D. in Mechanical Engineering, 1982
Area of Specialization: Human Factors

Wright State University, 1978
M.S. in Systems Engineering
Area of Specialization: Human Factors

Massachusetts Institute of Technology
1 year Graduate Study in Electrical Engineering, 1973

Wright State University
B.S. in Systems Engineering, 1972

ACADEMIC EXPERIENCE:

Professor of Mechanical Engineering at the University of Idaho (1995-2002): Teaching responsibilities include human factors, math modeling, mechanics, and statistics. Additional responsibilities include appointment as an adjunct professor in the Department of Psychology and Director of Idaho Space Grant Consortium.

Associate Professor of Mechanical Engineering at the University of Idaho (1990-1995): Teaching responsibilities include human factors, math modeling, mechanics, and statistics. Additional responsibilities include appointment as an adjunct professor in the Department of Psychology and Director of Idaho Space Grant Consortium.

EXHIBIT 

ACADEMIC EXPERIENCE: (Continued)

Assistant Dean for the College of Engineering at the University of Idaho (1989-1990): Administrative responsibilities included the overall administration of the Engineering Science curriculum, coordinating statewide off-campus programs, managing engineering cooperative education programs, and recruiting new students. Position also included teaching and research responsibilities.

Assistant Professor of Mechanical Engineering at the University of Idaho (1987-1988): This tenure track appointment was 65% Mechanical Engineering and 35% Engineering Sciences. Teaching responsibilities included math modeling, mechanics, statistics, and course development in human factors. Additional responsibilities included a position as an adjunct professor in the Department of Psychology to assist in the development of an interdisciplinary research laboratory and graduate program in human factors.

Assistant Professor of Engineering Science at the University of Idaho (1984-1987): This tenure track appointment was 50% in the Engineering Science Department and 50% in the Mathematics and Applied Statistics Department. Teaching responsibilities included courses in engineering mechanics, applied probability and statistics, and developing a course in human factors in engineering design. Additional responsibilities included helping staff the Statistical Consulting Center.

Assistant Professor of Engineering at Wright State University (1980-1984): Served as Program Director for the Human Factors Engineering Program. Teaching responsibilities included engineering statics, engineering dynamics, human factors engineering, senior seminar, and systems approach to human factors. Also held a joint appointment with the WSU School of Professional Psychology where the primary responsibility was to assist in the development of a Doctor of Psychology degree in Human Factors.

Tutor for the State of Ohio (1978): Worked as a personal tutor for individual college students being rehabilitated from mental illnesses.

Student Tutor (1969-1972): Worked as a tutor for Wright University, Dean of Students Office. Tutored courses in Mathematics and Physics.

PROFESSIONAL EXPERIENCE:

Engineering Consultant for Applied Cognitive Sciences (1983-Present): I have worked as an expert witness, for both the plaintiff and defense, on over 1000 legal cases nationwide. I have been qualified as an expert in human factors, accident reconstruction, mechanical engineering, safety engineering, and risk management. Work has also included contracts from U.S. government agencies (USAF Aeromedical Research Laboratory and Idaho National Engineering Laboratory) as well as private industry (Arvin Industries, The Vendo Corporation, Key Tronic Corporation, Port Townsend Paper, and Hewlett Packard).

PROFESSIONAL EXPERIENCE: (Continued)

Research Scientist for the USAF Office of Scientific Research (1983): This was an appointment at the USAF Aeromedical Research Laboratory. The work focused on assessing the relationship between acceleration-stress and pilot workload. In addition, I also worked on a project concerning the effects of high-onset rates of acceleration on pilot performance.

Graduate Research Assistant at the University of Illinois (1978-1981): Responsibilities included the conception and formulation of various research projects in the fields of Engineering Psychology and Mechanical Engineering.

Human Factors Engineer for the United States Air Force Human Resources Laboratory (1976-1978): Worked concurrently in two major fields: (1) visual simulation and (2) motion and force simulation. This included conducting in-house research as well as serving as program manager for externally conducted research.

Electronics Engineer for the United States Air Force Foreign Technology Division (1974-1976): Position required a Top Secret security clearance. The work involved the selection and analysis of intelligence data to predict foreign military trends and capabilities.

Process Control Engineer for Industrial Nucleonics Corporation (1973-1974): Worked on the development of an infra-red moisture gauge to allow real-time computer control for tobacco dryers. Responsibilities included the development of a calibration technique and system installation at an operational site.

Computer Operator for Synergy, Inc. (1970-1972): Operated a CDC 6600 Computer at Wright Patterson Air Force Base while attending undergraduate school.

HONORS AND AWARDS:

University of Idaho College of Engineering Outstanding Academic Advisor, 1998.

University of Idaho College of Engineering Outstanding Senior Faculty, 1996.

University of Idaho Alumni Award for Excellence, 1994.

American Society for Engineering Education Centennial Certificate Awardee, 1993.

Best Paper Award from American Society for Engineering Education Regional Conference, 1991.

ASUI Outstanding Faculty Award, 1991.

University of Idaho Alumni Award for Excellence, 1988.

HONORS AND AWARDS: (Continued)

Recipient of the New Engineering Educator Excellence Award from American Society for Engineering Education, 1987.

Recipient of the Dow Outstanding Young Faculty Award from the American Society for Engineering Education, 1986.

Selected as an S.C.E.E.E. fellow for the Air Force Office of Scientific Research Summer Faculty Research Program, 1983.

Graduated first in class at the University of Illinois (GPA 5.0 out of 5.0), 1981.

Member of Tau Beta Pi National Engineering Honor Society, 1979.

Recipient of the "Science and Engineering Career Motivation Award" which is given annually by the Dayton Board of Education, 1978.

Graduated first in class at Wright State University (GPA 4.0 out of 4.0), 1978.

Awarded National Science Foundation Traineeship to Massachusetts Institute of Technology, 1972.

Graduated first in class at Wright State University, summa cum laude (GPA 3.9 out of 4.0), 1972.

W.S.U. Foundation Scholarship, 1972.

W.S.U. Foundation Scholarship, 1971.

Golding Award (Outstanding Junior Engineer) at Wright State University, 1971.

Gill, R. The Role of Human Factors at Three Mile Island. Invited presentation by the Southern Ohio Chapter of the Human Factors Society, October 1982.

Gill, R. Human Factors in Education. Invited presentation by the Dayton Chapter of the I.E.E.E., October 1980.

Gill, R., Ross, T. and Albery, W. An Advanced Acceleration Simulation Device for the Flight Simulators. Presented at the Dayton-Cincinnati AIAA Mini-Symposium, 1978.

PROFESSIONAL ACTIVITIES:

Member of Human Factors and Ergonomics Society
Member of American Society for Testing and Materials
Member of American Academy of Forensic Sciences

GRANTS AND CONTRACTS:

Evaluation and Development of Warning Information for Portable Fire Shelters, Anchor Industries, Co-investigator, 2006.

Safety Analysis of Electronic Billboards, City of Snohomish, Principle Investigator, 2005.

Evaluation of Warning Label Designs, American Fun Kart Association, Principle Investigator 2002.

Idaho Space Grant Consortium, NASA, \$260,000, Assistant Director, 2001.

Idaho Space Grant Consortium, NASA, \$260,000, Assistant Director, 2000.

Transforming Engineering Consulting into Engineering Case Studies, University of Idaho, \$35,000, Sabbatical, 1999-2000.

Idaho Space Grant Consortium, NASA, \$256,500, Director, 1999.

NASA Experimental Program to Stimulate Competitive Research, \$225,000, State-wide Director, 1999.

Idaho Space Grant Consortium, NASA, \$256,000, Director, 1998.

Idaho Space Grant Consortium, NASA, \$255,000, Director, 1998.

Idaho Total Engineering Challenge, Lockheed Martin Aerospace Corporation, \$5,000, Principal investigator, 1997.

Idaho Space Grant Consortium, NASA, \$255,000, Director, 1997.

Idaho Space Grant Consortium, NASA, \$230,000, Director, 1996.

Summer Institute for Engineering Educators on Curriculum Design and Implementation for Interactive Teaching/Learning, University of Idaho Office of Teaching Enhancement, \$2,500, Co-principal investigator, 1995.

Idaho Space Grant Consortium, NASA, \$230,000, Director, 1995.

Evaluation of an F-16 Intelligent Tutoring System, Northrop Corporation, \$37,600, Co-principal investigator, 1994.

JETS Workshop, US Department of Energy, \$1,400, Co-principal investigator, 1993.

Workstation and Hand Tool Design for Disk Drive Assembly, Hewlett Packard, \$5,000, Co-principal investigator, 1993.

GRANTS AND CONTRACTS: (Continued)

Analysis of a Disk Drive Arm Assembly Line Process, Hewlett Packard, \$2,000, Co-principal investigator, 1992.

Multimedia for Enhanced Undergraduate Education, University of Idaho Office of Academic Affairs and IBM, \$81,000, Co-principal investigator, 1991.

JETS Summer Workshop, US Department of Energy, \$9,000, Co-investigator, 1991.

Analysis of a Paper Winder Safety Gate, Port Townsend Paper, \$2,500, Co-principal investigator, 1991.

Keymouse Configuration and Design, Key Tronic Corporation, \$6,700, Co-principal investigator, 1990.

Keymouse Usability, Key Tronic Corporation, \$18,900, Co-principal investigator, 1990.

JETS Summer Workshop, US Department of Energy, \$9,000, Principal investigator, 1990.

Mapping Knowledge in Declarative and Procedural Structures, Idaho State Board of Education, \$35,000, Co-principal investigator, 1990.

JETS Summer Workshop, US Department of Energy, \$22,000, Principal investigator, 1990.

A Program to Test and Evaluate Equipment for the Disabled, University of Idaho Research Office, \$7,000, Co-principal investigator, 1989.

Research Experience for Undergraduates, National Science Foundation, \$4,000, Co-principal investigator, 1989.

Stressor Interaction Assessment, Boeing Military Aircraft Corporation, \$21,600, Co-principal investigator, 1989.

Design and Evaluation of a Vending Machine Retrofit System, The Vendo Company, \$20,400, Principal investigator, 1988.

A Structural Technique for Evaluating Design Tools, National Science Foundation, \$60,000, Co-author and consultant, 1988.

Formations and Use of Conceptual Structures in Problem Solving Domains, Air Force Office of Scientific Research, \$79,200, Co-principal investigator, 1988.

Software Interface Design for Asynchronous Computer Conferencing, EG&G of Idaho, \$12,800, Co-principal investigator, 1987.

GRANTS AND CONTRACTS: (Continued)

Techniques for Augmenting the Communication of Spatial Information, Boeing Military Aircraft Company, \$15,000, Co-principal investigator, 1987.

Evaluation of Warning Label Effectiveness, Arvin Industries, \$1,400, principal investigator, 1986.

A Structured Approach for Developing an Effective Teaching Methodology for Problem Solving: A Case Study, American Society for Engineering Education, \$1,500, principal investigator, 1986.

The Development of an Innovative Technique for Using Personal Computers to Aid in Teaching Deaf People to Speak, University of Idaho Seed Grant, \$3,300, principal investigator, 1986.

The Development of a Steady State EEG Measure of Acceleration Induced Peripheral Light Loss, United States Air Force Aerospace Medical Research Laboratory, Human Engineering Division, \$7,100, principal investigator, 1985.

The Feasibility of Using Electroencephalograms to Measure Acceleration Stress, United States Air Force Aerospace Medical Research Laboratory, Human Engineering Division, \$14,000, principal investigator, 1984.

The Effects of Acceleration Stress on Cognitive Workload, United States Air Force Aerospace Medical Research Laboratory, Biomechanics Division, \$35,000, principal investigator, 1984.
